

Until go-pdf/fpdf supports UTF-8 encoded source text, source text needs to be specified with all special characters escaped to match the code page layout of the currently selected font. By default, gofpdf uses code page 1252. See [Wikipedia](https://en.wikipedia.org/wiki/Code_page_1252) for a table of this layout.

Voix ambiguë d'un cœur qui au zéphyr préfère les jattes de kiwi.

Falsches Üben von Xylophonmusik quält jeden größeren Zwerg.
